Subject: RE: Request for ATSDR/TDSHS Assistance

Hi Gary –

Thank you for sending all the information and maps. I really appreciate it.

We are looking at calendars and availability to figure out when we can get out there. I will let you know as soon as we confirm.

In the meantime, can you please clarify #1 below? Are you wanting a report (Health Consultation or Letter Health Consultation) reviewing the data or just review the data for the benefit of answering questions from community members? We can review the data for a report, but unfortunately bc of all the review processes, it will probably take a year to release a final report. **I was hoping you guys could review the data and at least provide me with issues you see from a short or long term health issue.**

We are thinking to do a report of the community concerns and responses to those concerns, but again that would take the same time period to be released. **A report is fine but if you could get that information to me as quickly as possible so that I can see if we have the ability to address the concerns more quickly.**

Also – I'm not sure we could do a "medical flyer", but we will definitely have a flyer with some brief background on the site and how to reach us both while we are out there as well as back at the office. Can we also provide a way to contact you on that flyer? **That was just a brainstorm idea. I am not sure what it would look like anyway. I was wanting to say that the data suggests no health issues are expected based upon the current data within the residential area.**

We will record all the information we collect and provide you with any questions we get that we need you (or at least your help) to answer.

And we can definitely be available for community meetings. Please provide us with as much prior notice as you can, and maybe check our schedule before setting a date to make sure we don't have a conflict. **No Problem. We will give you guys a heads up.**

Send me the name of the Point of contact for you guys to put in our future flyers.

Thanks!

Subject: CES: Request for ATSDR/TDSHS Assistance

I am requesting the assistance of ATSDR and TXDHS to perform the following activities at the CES Environmental Services Inc. Site in Houston, Harris County, TX.

- 1. Review available analytical data;**
- 2. Hand out a medical flyer about the site and how to get hold of TDSHS;**
- 3. Walk through the community and determine and record any concerns (health or other);**
- 4. Be available for public meetings (none scheduled yet).**

The area in purple is the area that I think may be necessary to talk with people.

Thanks

Gary Moore
